

StarBoard eChart

USER'S GUIDE

eChart app

The eChart app enables you to connect your Apple or Android mobile device to your capture board and then do the following:

- View notes you write on your capture board on your mobile device
- Share your notes with others
- Save your notes

About this guide

This guide explains how to use your capture board. It includes the following information:

- How to use your capture board and the eChart app
- How to maintain your capture board for years of use
- How to troubleshoot issues with your capture board

This guide is intended for individuals who use and maintain capture boards. Other documentation and resources are available for individuals who install capture boards.

Tutorial and Help

When you first start the eChart app on your mobile device, a tutorial opens. This tutorial explains how to connect your mobile device to your capture board, share and save your notes.

You can view the tutorial subsequent times. You can also view troubleshooting and support information in the Help.

For Apple devices, you can open the tutorial by pressing Settings on the app home screen and then pressing Tutorial.

Using your capture board

Connect your mobile device to your capture board

If you want to share the notes you have written on your capture board with others, you need to connect your mobile device to the capture board.

Following types of mobile devices can be connected to your capture board:

Connect mobile device to capture board by using the app

After installing the eChart app, it can be used to connect mobile device to capture board by QR code.

Connect your mobile device by QR code

1. Start the eChart app on your mobile device.

2. Hold your mobile device's rear-facing camera still over your capture board's QR code so that the QR code appears in the center of the screen of the app. Then the app connects the mobile device to the capture board.

3. Connecting the capture board for first time, you should set up the system in the corresponding Wi-Fi connection, after several times of connection, grabbers will connect the corresponding Wi-Fi automatically.

NOTE

If the app doesn't connect your mobile device to your capture board, move your mobile device closer to the capture board or further away from the capture board so that the app can capture the QR code.

If the connection fails several times, restart the capture card and reconnect to Wi-Fi.

View notes on your mobile device

When the mobile device and capture board are connected, you can view the notes through the mobile device you've written on your capture board. When you write or erase notes, the changes appear on your mobile device automatically.

By default, your mobile device displays your capture board's entire writing process. You can zoom in, zoom out by using gestures:

Zoom in

Zoom out

Disconnect your mobile device

Your mobile device disconnects from your capture board automatically in the following situations:

- close the app.

- capture board is out of your mobile device's Wi-Fi communication range, which is approximately 65" (20 m).

Manually disconnect your mobile device:

Press **Close**  at the top left on your mobile device in the eChart app
